Subject: MVRACES Golden Guardian Notice: 7.8 Earthquake Struck Along San Andreas Fault - THIS IS A DRILL

THIS IS A DRILL

“ A magnitude 7.8 earthquake struck along the San Andreas Fault.

The earthquake began in the area northeast of the Salton Sea, and created a rupture that moved northwest.

The earthquake is rendering many phone systems unusable, due to the large call volume.

Immediately after the shaking stopped, existing emergency response measures in Salton Sea area were implemented.

Due to the ground motion and resulting liquefaction, there is widespread damage to local buildings and infrastructure.

It is initially estimated that 40,000 persons in the area were displaced due to ground motion and initial fires.

The scope of damage to Orange County is not yet known. “

THIS IS A DRILL
